Mean	70.1	69.1
Maximum	93.4 on Jul 10	-
Minimum	50.5 on Jul 02	-

	Precipitation (in.)	1991–2020 avg. (in.)
Total	2.16	2.85
Since Jan 1	8.23	8.73
Snowfall	0.0	0.0
Since July 1	0.0	0.0

Summary

Temperatures in July were slightly above average in Los Alamos, with most nights near normal and several days warmer than usual. The hottest day of the year occurred on July 10, reaching 93°F.

Although there were multiple opportunities for monsoonal rain, with measurable precipitation on 13 days, many storms produced too little rain or missed the area entirely. As a result, both Los Alamos and White Rock ended the month with below average rainfall. Fortunately, precipitation for the year is still only slightly below average. As shown below, much of northwestern New Mexico also experienced below average precipitation for the month.

New Mexico - Precipitation July 2025, Percent of 1991-2020 Average
