

Weather at Los Alamos

September 2026

Temperature & Precipitation

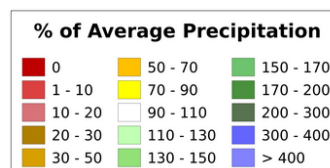

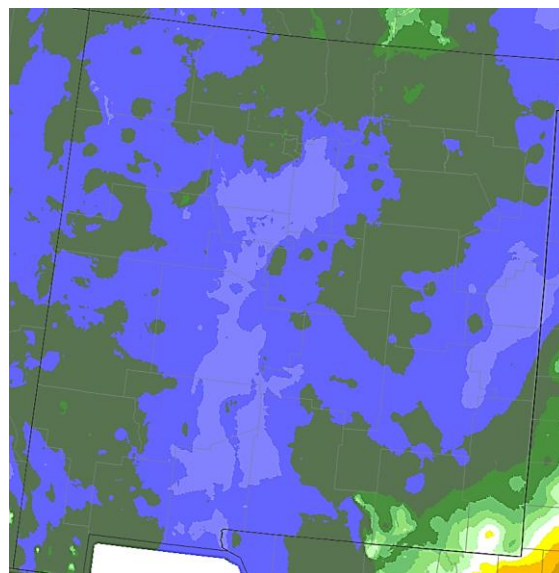

Summary

The first half of September started with warmer than normal temperatures, reaching the mid to upper 80s and even tying a few daily maximum records, along with some light rain. A shift began on the 15th, when significant rainfall moved in and continued through the end of the month, bringing temperatures back into the normal range.

Rain was measured in Los Alamos on two-thirds of the days in September, totaling 5.66 inches, which is more precipitation than the previous three Septembers combined. This tied the third wettest September on record. This substantial rainfall helped bring the year-to-date precipitation close to normal after running well below normal for much of the year. As shown below, most of New Mexico was well above average in precipitation with some areas measuring over 400% of normal.

	Temperature (°F)	1991–2020 avg. (°F)
Mean Max	74.5	73.5
Mean Min	54.0	48.4
Mean	64.2	61.0
Maximum	88.6 on Sep 11	-
Minimum	45.2 on Sep 30	-

	Precipitation (in.)	1991–2020 avg. (in.)
Total	5.66	2.02
Since Jan 1	13.67	13.95
Snowfall	0.0	0.0
Since July 1	0.0	0.0
