

About Yourself:

- 1.
2. Bio:
 - a. Pascal Grosset is a scientist in the Data Science team at Los Alamos National Laboratory. Originally from Mauritius, he earned his PhD in Computing (Graphics and Visualization) from the University of Utah as a recipient of the International Fulbright Science and Technology Award, and joined Los Alamos as a postdoctoral researcher in 2016. His work centers on developing scalable workflows for large-scale scientific data in close collaboration with domain scientists, enabling efficient analysis of complex simulation outputs. His research spans the application of AI to scientific workflows, as well as the design of algorithms and tools for the analysis, compression, and visualization of massive datasets generated by high-performance computing systems. He has contributed to major national initiatives, including the DOE Exascale Computing Project, and currently works on the DOE Genesis project.
